Introduction

The State of California has ambitious goals to reduce greenhouse gas emissions and address climate change.

In 2006, the Legislature passed the California Global Warming Solutions Act (Assembly Bill 32), which created a comprehensive, multi-year program to reduce greenhouse gas (GHG) emissions in California. In the subsequent Scoping Plans, intended to describe the approach California will take to reduce GHGs, one of the primary methods identified is increasing efficiency in existing buildings. Senate Bill 32, passed in 2016, sets the goal of reducing GHG emissions to 40% below 1990 levels by 2030.

With so many headlines about electric vehicles, rooftop solar and other renewables, it is easy to forget how important energy efficiency is to the GHG reduction mix. Billions of square feet of existing commercial and residential properties, and the equipment and appliances vital to them, are in need of energy upgrades.

There is simply not enough government or ratepayer funding to pay for these upgrades.

With this awareness, the California Public Utilities Commission (CPUC) allocated funds to launch several pilot programs designed to attract private capital to finance energy efficiency (EE) upgrades in Decision (D.)13-09-044. In its guidance decision, the CPUC acknowledged that EE measures are important tools for addressing greenhouse gas emissions, and that lowering the barriers to EE retrofits and financing—particularly in underserved market sectors—is critical to reaching the state’s goals of reduced energy consumption and spreading benefits to all Californians.

Regulatory Background

D.13-09-044 authorized a series of financing programs designed to attract private capital to finance EE upgrades and established the California Hub for Energy Efficiency Financing (CHEEF) to administer the new programs. The CPUC requested that the California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA) assume the administration of the CHEEF and directed the investor-owned utilities (IOUs) and CPUC staff to assist CAEATFA with implementation.

The financing programs incentivize private finance companies to enter the EE market and improve terms or expand credit criteria for the financing of EE projects by providing a credit enhancement funded with IOU EE ratepayer funds. Financing that covers 100% of project costs removes the upfront cost barrier for Californians to undertake EE retrofits. A key objective is to test whether transitional ratepayer support for credit enhancements can lead to self-supporting EE finance programs in the future.

In D.17-03-026, the CPUC committed to continued funding for CAEATFA to administer the CHEEF Programs through the life of the pilots, and Resolution E-4900 established metrics for evaluating the Programs. In 2020, the Commission issued Resolution E-5072 transitioning the Residential Energy Efficiency Loan Assistance Program (now known as GoGreen Home Energy Financing) from a “pilot” to a “Program” and further clarifying the goals and metrics under which the CHEEF Programs would be evaluated. D.21-08-006 authorized up to \$75.2 million in incremental funding for the CHEEF Programs to support their administration through June 30, 2027, authorized CAEATFA to incorporate non-IOU ratepayer funds to support program expansion into non-IOU customer territories and imposed new reporting requirements.

This report is prepared in alignment with D.13-09-044 and D.21-08-006, which directs CAEATFA, in conjunction with the IOUs (Pacific Gas & Electric [PG&E], Southern California Edison [SCE], San Diego Gas & Electric [SDG&E] and SoCalGas [SCG]), to issue quarterly reports on the progress of the CHEEF Programs. These reports contain quarter highlights and other items to keep interested parties informed as to the Programs' challenges and successes.

Program Names and Public Platform

"GoGreen Financing" is the name of the website and marketing platform that has been used to publicly identify the CHEEF Programs since 2017. In Q2 2021, CAEATFA and its stakeholders began referring to the CHEEF Programs as the GoGreen Financing Programs, and the names of the individual Programs were updated to align with the platform as follows:

- **GoGreen Home Energy Financing**, or **GoGreen Home**, replaced the Residential Energy Efficiency Loan Assistance Program (REEL)
- **GoGreen Business Energy Financing**, or **GoGreen Business**, replaced the Small Business Energy Efficiency Financing Program (SBF)
- **GoGreen Affordable Multifamily Energy Financing**, or **GoGreen Multifamily**, replaced the Affordable Multifamily Energy Efficiency Financing Program (AMF)

Reporting Updates in Response to D.21-08-006

D.21-08-006 requires CAEATFA to report on several new metrics and key performance indicators, as well as those previously outlined in Resolution E-4900. Many of these metrics, such as number of loans, total amount financed, analysis of participants (including underserved borrowers), growth rates, and mean APR and loan values, were already included in [quarterly reports and data summaries](#) prior to D.21-08-006. CAEATFA will continue to report on these metrics.

Although D.21-08-006 does not require CAEATFA to report on the new metrics until the start of the new budget period in July 2022, CAEATFA has begun reporting on many of these metrics on an earlier timeline. For example, this report and the monthly data summaries for GoGreen Home now contain median loan size, median interest rates, and expanded reporting on geographic distribution of loans and non-energy benefits for borrowers. Some of the requested new reporting measures require resource dedication and establishment of new processes before they can be implemented. To report on energy savings, CAEATFA worked with a technical consultant to create deemed savings estimates and published the first version of the GoGreen Home Deemed Energy Savings Report, covering GoGreen Home activity from 2016 through 2021, in April 2022; a second report covering savings from 2016 through June 2022 was posted in September. To report on ethnicity and socioeconomic data, CAEATFA will institute a post-project survey and collect this data on a voluntary basis from participants.

These and other newly required metrics will be added to quarterly reports and in standalone documents on a rolling basis as CAEATFA establishes the operational changes necessary to report the data. Please see Appendix 9 for a detailed breakdown of reporting requirements and CAEATFA's compliance status.

Executive Summary – Q3 2022

Outreach Highlights

- **CAEATFA staff participated in outreach events to promote the Programs.** In addition to holding meetings with potential Program partners, staff attended the California Climate and Energy Forum in September, representing GoGreen Financing to local government representatives and industry professionals from around the state. Additionally, staff presented details of the GoGreen Business Program to the Golden Gate Restaurant Association in San Francisco.

GoGreen Home Energy Financing Program Developments

- **GoGreen Home lenders enrolled 355 standard loans in Q3.** The standard loans enrolled over the course of the quarter, worth a combined financed amount of more than \$6.5 million, represent the highest number of loans and total amount financed achieved in one quarter since Program inception. Q3 saw a 36% increase in number of loans from the previous high in Q2 and a 51% increase over Q3 2021.
- **Loan enrollments for projects including heat pump technologies remained consistent.** In Q3, 75 projects installed heat pump technologies, which was the same number of projects as in Q2. Twelve loans were credit enhanced in whole or in part via CAEATFA's partnership with TECH Clean California, which supports decarbonization efforts among joint gas IOU/electric POU customers. Of the 12, 9 were TECH-only projects that could not have been financed through the Program without the TECH partnership.
- **The second GoGreen Home Deemed Energy Savings Report was published showing an increased rate of greenhouse gas emissions (GHG) savings from Program projects.** GHG savings from gas measures in Q1 and Q2 2022 alone nearly equaled GHG savings from gas measures for all of 2021.

GoGreen Business Energy Financing Program Developments

- **One project was enrolled in GoGreen Business in Q3,** bringing the total amount financed since Program inception to \$2.3 million.
- **The first project to use On-Bill Repayment (OBR) functionality was formally enrolled in the Program.** Repayment through the customer's Southern California Edison bill was slated to begin in Q4.

CHEEF Infrastructure Developments

- **The new Statewide Marketing Implementer began work with CAEATFA and the IOUs.** The SoCalGas contract with marketing firm Riester took effect July 1 with an annual authorized budget of \$1.6 million; the contract lasts through June 30, 2025, with the option to extend for two additional year-long periods.

GoGreen Home Energy Financing Program

Key GoGreen Home Metrics – Q3 2022 (July 1-September 30, 2022)

Standard Loans

355 New Loans Enrolled	\$18,463 Average Loan Size	\$6.55 million Amount Financed
----------------------------------	--------------------------------------	--

View the [GoGreen Home monthly data summaries](#)

GoGreen Home Updates

In Q3, GoGreen Home lenders enrolled 355 new standard loans worth \$6.55 million, with an average project size of \$18,463. This is the highest number of loans enrolled and the largest amount financed during a single quarter since Program inception. Q3 loan enrollments represent a 51% increase in the number of new standard loan enrollments and a 68% increase in the amount financed over Q3 2021. Since Program inception in 2016, GoGreen Home has financed 2,472 standard loans at a combined value of \$42.97 million.

In Q3, 75 of the 355 projects enrolled included heat pump technologies, which support the State's efforts to transition from equipment that uses carbon-based fuel sources to electric alternatives that are more easily powered by clean energy and emit fewer greenhouse gases when operated. Along with Q2 2022, this was the highest number of heat pump projects installed in one quarter during the Program's history and more than triple the number installed in Q1 of this year.

Twelve of the 75 heat pump loans were supported through a new partnership between CAEATFA and the TECH Clean California Initiative, which was finalized in Q1. Through a Memorandum of Agreement between CAEATFA and TECH's third-party implementer, Energy Solutions, TECH funds support credit enhancements and administrative costs for customers who receive gas service from an IOU and electric service from a POU, which allows these joint IOU gas/POU electric customers to finance eligible electric measures (particularly heat pumps) through their GoGreen Home loan without the fuel source restrictions that they previously faced. Of the 12 total loans that were credit enhanced in part or in full by TECH, 9 were TECH-only projects, meaning they could not have been financed through the Program without TECH support.

New enrollments of marketplace microloans via the SoCalGas online platform were paused in Q2 as Enervee (the implementer of the SoCalGas marketplace platform) onboards a new lender for this product. Marketplace microloan enrollments are expected to resume in early 2023.

CAEATFA published the second Deemed Energy Savings Report for GoGreen Home during Q3, building on and refining the methodology that informed the first report, published in Q2. The report indicates an increased rate of gas savings through the Program, with deemed savings and attendant reductions in greenhouse gas (GHG) emissions during the first half of 2022 nearly equaling gas-related savings from all of 2021. The increase is attributed to the greater number of decarbonization measures (mainly heat pump technologies) financed through the program in 2022.

GoGreen Home Outreach

The contract between SoCalGas and the new Statewide Marketing Implementer, Riester, took effect on July 1. In Q3 Riester worked with CAEATFA and the IOUs to set up infrastructure and complete the transition of operations from the previous Marketing Implementer, Center for Sustainable Energy (CSE). CSE's contract with SoCalGas had previously been amended to remain active until the end of Q4 to accommodate the potential invoicing of interest rate buy-down funds offered through a GoGreen Multifamily Program promotion (see page 22 for details). During Q3 CSE staff working in a reduced capacity to support the transition to Riester, concluding its work on behalf of the Program at the end of the quarter.

After onboarding in Q2, the new Contractor Manager, EGIA, continued outreach to contractors via newsletters featuring Program updates and contractor education. A total of 632 contractors were enrolled in GoGreen Home at the end of Q3. Over the course of the quarter, 38 new contractors joined the Program. Three contractors were removed or suspended from the Program in Q3.

For information about GoGreen Home program structure and eligibility, see Appendix 7.

GoGreen Home Reporting

Data reported on pages 10-17 represents standard GoGreen Home loans enrolled through one of the eight participating credit union lenders. For data on marketplace microloans, see pages 17-18.

Standard Loans: Project Enrollment and Activity Data

Table 1: GoGreen Home Financing Activity

	Q3 2022		All Time ¹	
Loans Enrolled	355		2,472	
Total Amount Financed	\$6.55 million		\$42.97 million	
	Average	Median	Average	Median
Loan Size	\$18,463	\$15,760	\$17,382	\$14,590
Term Length in Months	110	120	106	120
Interest Rate²	4.38%	4.38%	5.21%	5.38%
Finance-Only Projects³	87%		87%	

Table 2: GoGreen Home Loan Loss Reserve Contributions Metrics

	Q3 2022	All Time
Total Loan Loss Reserve Contributions⁴ <i>All contributions made by CAEATFA to loan loss reserve accounts for all enrolled standard loans.</i>	\$1,057,638	\$6,647,492
Average Loan Loss Reserve Contribution <i>The average contribution made by CAEATFA to a loan loss reserve account upon standard loan enrollment.</i>	\$2,979 per loan	\$2,689 per loan
For every \$1 of ratepayer-funded credit enhancement, the amount of private capital leveraged is:	\$6.20	\$6.46

Table 3: GoGreen Home Loans Enrolled by IOU⁵

Utility	Loans Enrolled	
	Q3 2022	All Time
Pacific Gas & Electric	295 (\$5.16 million)	1,617 (\$26.38 million)
San Diego Gas & Electric	6 (\$0.13 million)	128 (\$2.24 million)
Southern California Edison	48 (\$1.06 million)	667 (\$12.63 million)
Southern California Gas	53 (\$1.23 million)	733 (\$14.70 million)

¹ The date of Program inception is marked by the first loan enrollment in GoGreen Home (July 2016).

² GoGreen Home interest rates are currently equivalent to the Annual Percentage Rate (APR) as no additional fees, such as origination fees, are charged by participating lenders for these loans. Some lenders charge a membership fee, which tends to be around \$5 and is de minimis for reporting APR.

³ Cases in which a borrower made upgrades using GoGreen Home without a rebate or incentive.

⁴ These contributions include those from IOU ratepayer funds as well as external funding sources, including funds from TECH Clean California.

⁵ Some properties are served by more than one IOU, meaning the total of loans enrolled per IOU will not match the total number of loans enrolled. Loans enrolled by IOU are reported regardless of what measures are installed.

Table 4: GoGreen Home Loan Enrollment (Q3 2016 – Q3 2022)

The final column reflects the loans enrolled thus far in 2022, which will increase in future quarters.

Table 5: GoGreen Home Loan Enrollment Comparison (Q3 2020, Q3 2021 and Q3 2022)

Table 6: GoGreen Home Loan Enrollments by Participating Lender

Matadors Community Credit Union	5	\$62,184	\$55,966	\$0
Valley Oak Credit Union	1	\$9,702	\$0	\$0
Net Credit Enhancement Funds Expended (Claims Paid minus Recoveries Paid to Program)				\$298,474

Table 9: Interest Rate and Monthly Payment Benefits for GoGreen Home Borrowers (Q3 2016 – Q3 2022)

⁶ Through GoGreen Home, participating lenders may submit a claim for reimbursement for up to 90% of a charge-off of the outstanding Claim-Eligible Principal Amount. The Claim-Eligible Principal amount may be less than the Total Principal Amount. The Claims Paid column reflects the amount that GoGreen Home Lenders were paid on the claim.

⁷ These charts compare interest rates between GoGreen Home loans and the equivalent non-GoGreen Home signature products offered by the Program's participating lenders, using a data set for loans with terms up to 60 months for borrowers who would have qualified for non-GoGreen Home loans.

⁸ This chart compares monthly payments between GoGreen Home loans with terms greater than 60 months and what monthly payments would have been if the borrower had used the same lender's non-GoGreen Home signature product limiting them to shorter term lengths. Loans from one participating lender who currently offers signature products with terms greater than 60 months are excluded from this comparison.

Table 10: GoGreen Home Borrower Credit Score Metrics (Q3 2016 – Q3 2022)

How GoGreen Home Standard Loans Serve the Underserved

Table 11: Loan Activity by Census Tract Income and CalEnviroScreen Score

⁹ Low-to-Moderate Income (LMI) census tracts, for the purpose of this reporting and providing a 20% loss reserve contribution for the lender, includes tracts with median income that falls below 120% of the Area Median Income (AMI).

¹⁰ [CalEnviroScreen](#) is a pollution burden mapping tool that uses environmental, health, and socioeconomic data to produce scores for every census tract in California; CAEATFA is reporting loans for properties in tracts scoring in the top quartile (75-100%) as loans for projects in disadvantaged communities (DACs). This data uses the most recent version of CalEnviroScreen available at the time of publication.

Table 12: GoGreen Home Financing Feasibility Metrics

Access to Credit: <i>Borrower Credit Score of 580-640</i> Lenders typically require borrowers to have a minimum credit score of around 640 for unsecured loans of any significant value. Through GoGreen Home, lenders are able to approve loans for borrowers with credit scores as low as 580.	Loans Enrolled to Borrowers with <640 Credit Score	
	14 Q3 2022	117 All Time
Affordable Monthly Payments: <i>Term Lengths >5 Years</i> The vast majority of lenders typically offer a maximum term length of 5 years for unsecured loans. Through GoGreen Home, lenders are able to extend terms out to 15 years, which significantly lowers monthly payments for borrowers.	Loans Enrolled to Borrowers with Term Lengths >5 Years	
	224 Q3 2022	1,492 All Time
Access to Capital: <i>Loan Amounts >\$25,000</i> Sufficient access to capital is needed for deeper energy retrofits. While lenders typically limit unsecured loans to about \$25,000, most lenders are able to offer up to \$50,000 for all borrowers through GoGreen Home.	Loans Enrolled to Borrowers with Total Financed Amount >\$25,000	
	61 Q3 2022	408 All Time

Measures Installed

Map of GoGreen Home Standard Loans Enrolled by County (Q3 2016 – Q3 2022)

In the counties depicted in gray, 0 GoGreen Home loans have been enrolled. Of these, IOU service is limited or nonexistent in the following: Alpine, Del Norte, Lassen, Modoc, Mono, Sierra, Siskiyou, Trinity.

Map of GoGreen Home Standard Loans for Properties in Disadvantaged Communities¹¹ by Zip Code (Q3 2016 – Q3 2022)

Marketplace Microloans

For the past three quarters this section has reported on microloans enrolled by One Finance and Enervee, which together offered a product available to customers for financing purchases from the SoCalGas utility marketplace. Microloans, per the GoGreen Home regulations, are limited to \$5,000 and are reported on separately so as not to skew data presented for full-size (“standard”) loans. One Finance offered a 60-month term length and a single interest rate of 9.02% to all borrowers.¹² **In Q2, Enervee paused microloan financing in order to onboard a new lender to replace One Finance; activity is expected to resume in early 2023.**

¹¹ For reporting purposes, CAEATFA considers properties in zip codes in the top quartile (75-100%) of CalEnviroScreen scores to be disadvantaged communities (DACs). This data uses the most recent version of CalEnviroScreen available at the time of publication.

¹² One Finance’s offer of marketplace microloans ended in June 2022. Enervee’s loan enrollments are expected to resume in 2023 through a new lender who will join the GoGreen Home Program.

Table 15: Marketplace Microloan Financing Activity (All Time)

Microloans Enrolled	496 ¹³		
Total Amount Financed	\$725,579		
Loan Size	\$1,463 <i>Average</i>	\$1,192 <i>Median</i>

Total Loan Loss Reserve Contributions	\$135,667		
Average Loan Loss Reserve Contribution	\$274 per microloan		
Top 3 Appliances Purchased	217 <i>Clothes Dryer</i>	210 <i>Clothes Washer</i>	178 <i>Gas Oven/Range</i>

Table 16: Marketplace Microloan Borrower Credit Score Metrics (Q3 2021 – Q3 2022)

Table 17: Marketplace Microloan Portfolio Summary (Q3 2021 – Q3 2022)

Marketplace Microloan Portfolio Summary as of September 30, 2022		
Paid in Full	22 Loans	\$26K
Current Outstanding ¹⁴	395 Loans	\$436K
30-60 Days Past Due	41 Loans	\$60K
90-120 Days Past Due	38 Loans	\$52K
Charged Off	0 Loans	\$0

¹³ As part of this financing option, customers may return their appliance within the supplier's return window. In the event of a return, their debt obligation becomes cancelled, and therefore the total number of microloans reported as enrolled each month will include a small percentage of loans that will be cancelled. CAEATFA processes these removals on an ongoing basis as needed, and the "All Time" totals reflect any previously enrolled loans that have since been cancelled.

¹⁴ Reflects the outstanding, unpaid principal balance for the 395 microloans.

GoGreen Business Energy Financing Program

Key GoGreen Business Metrics – Program Inception through Q3 2022

19	\$2.26 million	99	8
Total Projects Enrolled	Total Amount Financed	Participating Contractors and Project Developers	Participating Finance Companies

View the [GoGreen Business quarterly data summaries](#).

GoGreen Business Updates

The first project to take advantage of on-bill repayment (OBR) functionality was enrolled in GoGreen Business in Q3, with repayment via the customer's Southern California Edison (SCE) bill scheduled to begin in Q4. The \$84,367 project brings the total amount financed since Program inception in 2019 to more than \$2.26 million. OBR functionality, which allows customers to repay their GoGreen Business financing agreement through their monthly utility bill, is currently available in three of the four IOU service areas (SCE, SoCalGas and SDG&E); staff continues to coordinate with PG&E on finalizing the tariff governing OBR availability in its service area. Staff also conducted its regular outreach to enrolled and prospective finance companies, contractors and project developers to discuss Program opportunities.

Modifications to regulations governing GoGreen Business took effect in Q3. Those modifications include rules for OBR, streamlined underwriting requirements for finance providers offering microloans (defined as loans of \$10,000 or less), additional Energy Saving Measures, and additional Energy Saving Measures made available for self-installation, as well as other clarifications.

Lastly, staff published the first GoGreen Business Quarterly Data Summary. The report, showing key program metrics from Program inception through Q2, will be followed by quarterly updates moving forward.

GoGreen Business Outreach

Two of the IOUs ran GoGreen Business marketing campaigns during Q3. SCE ran a social media and digital advertising campaign targeting the restaurant and hospitality industries during August and September. At the end of the quarter, SoCalGas launched a GoGreen Business campaign slated to run well into Q4.

The new Contractor Manager continued outreach to prospective and enrolled contractors and project developers via newsletters and phone calls. At the end of Q3, customers could choose from 99 enrolled GoGreen Business contractors and project developers listed on GoGreenFinancing.com.

Table 18: GoGreen Business Finance Agreement Status by Lender as of September 30, 2022

	Finance Agreements Enrolled	Total Amount Financed
Accessity¹⁵	0	\$0
Alliance Funding Group	0	\$0
Ascentium Capital	12	\$829K
DLL Financial Solutions Partner	4	\$1,144K
Prime Capital Funding	0	\$0
Renew Energy Partners	0	\$0
Travis Credit Union	0	\$0
Verdant Commercial Capital	3	\$287K
	19	\$2,261K

For information about GoGreen Business program structure and eligibility, see Appendix 7.

¹⁵ Accessity enrolled in GoGreen Business as a Participating Finance Company in Q2 2021. Accessity planned to offer loans through the Program via SDG&E's Small Commercial Program, operated by Willdan. However, in Q1 2022, the SDG&E program was closed due to low activity. CAEATFA staff are discussing alternate options for a GoGreen Business product offering with Accessity.

Image from GoGreen Financing digital campaign

GoGreen Affordable Multifamily Financing Program

GoGreen Multifamily Updates

Following the close of the interest rate buy-down (IRBD) promotion at the end of Q2, CAEATFA staff continued coordinating with the property owner who had reserved IRBD funds. In mid-Q3, however, the customer withdrew the project, citing the need for unanticipated additional work that would have delayed it beyond the October installation deadline. The project, to replace a gas-fueled boiler with a heat pump water heater, among other measures, would have been the first for the GoGreen Multifamily Program.

Challenges

Property owners in the affordable multifamily sector must navigate complex debt structures and arduous project development processes to complete energy efficiency upgrades. Prior to launching the IRBD promotion, staff had determined that the credit enhancement alone could not sufficiently reduce interest rates to make energy efficiency projects feasible for these types of properties; the experience of the promotion indicates that reducing the interest rate further still does not resolve all the challenges of these projects. Staff continue to maintain communications with Program partners to work towards facilitating projects.

For information about GoGreen Multifamily program structure and eligibility, see Appendix 7.

Nonresidential Program

In Q2, CAEATFA formally requested that the CPUC re-authorize the Nonresidential Program to allow large commercial and nonresidential entities access to GoGreen Financing. A response from the CPUC is anticipated in 2023.

The Public Buildings/Large Commercial Financing Program, as it is now referred to, would support financing for properties in the large commercial and MUSH (municipal, university, schools, and hospitals) sectors. If authorized, this program would allow these types of facilities to use the existing On-Bill Repayment (OBR) infrastructure for their financing.

The Nonresidential Program was originally authorized in 2013 as an OBR program for large commercial and public buildings, with no credit enhancement. The launch of this program was thus dependent upon the development of OBR functionality, a complex feature that took several years to develop and was made available in 2022. However, D.17-03-026 from the CPUC required all CHEEF programs to be launched by the end of 2019, at which time OBR was not yet developed. The Nonresidential Program was effectively cancelled at that point.

In the event that CAEATFA is authorized to develop this program again, prior work can be leveraged to establish it. While developing program design and regulations for GoGreen Business, CAEATFA staff anticipated how the program would be incorporated into the CHEEF's offerings.

CHEEF Infrastructure

Contracting Updates

The SoCalGas contract with RIESTER, the new Statewide Marketing Implementer, took effect on July 1, 2022. The contract was issued for three years with an allowance for two optional one-year extensions, with the budget not to exceed \$8 million over the entire possible five-year term as outlined in a Budget Advice Letter filed jointly by the IOUs (SoCalGas Advice No. 5883). Although the contract is held by SoCalGas, CAEATFA works closely with the marketing implementer to advise on programmatic needs.

CPUC Clean Energy Financing Proceeding: Track 2 Proposal

In Q2, CAEATFA [proposed](#) expanding the CHEEF Programs via Track 2 of the CPUC's Rulemaking on Clean Energy Financing (R.20-08-022). A response from the CPUC is anticipated in 2023. In its proposal, CAEATFA requested:

- 1) **Expansion to include comprehensive clean energy technology.** CAEATFA requested authorization to offer credit enhancements for comprehensive clean energy technologies beyond energy efficiency and demand response measures through the GoGreen Financing Programs, either using funds from its existing approved budget or by bringing in external funds. CAEATFA has advocated for this ability for several years, including as part of the recent Decision authorizing the continuation of the Programs through June 30, 2027 (D.21-08-006). If approved, CAEATFA staff expect that this broad measure eligibility would achieve several programmatic goals, including eliminating program complexity; addressing demand from customers, contractors, and lenders; and contributing more significantly to the State's goals of decarbonization and resilience.
- 2) **Re-authorization of the Public Buildings/Large Commercial Financing Program.** CAEATFA has also requested that the CPUC re-authorize the Nonresidential Program initially authorized in D.13-09-044. Now referred to as the Public Buildings/Large Commercial Financing Program, this program would support financing for properties in the nonresidential, large commercial, and MUSH (municipal, university, schools, and hospitals) sectors. If authorized, this program would allow these property types to use the existing On-Bill Repayment infrastructure for their financing without the use of a credit enhancement.

Appendices

Appendix 1: Budget and Expenditures

Budgetary Authorization

D.13-09-044 directed the IOUs to allocate a total of \$75.2 million to finance the programs over the initial period ending June 30, 2022, referred to as the “Pilot Phase” below. In August 2021, the CPUC issued Decision D.21-08-006 authorizing up to an additional \$75.2 million in incremental funds to support existing CHEEF programs for an additional five-year period from July 1, 2022 through June 30, 2027 (FY 22-26), referred to below as the “Program Phase.”

As of June 30, 2022, a total of \$26.9 million of the original \$75.2 million authorized for the Pilot Phase period remained which had not been either expended or allocated as loan loss reserves. After carrying over the remaining \$26.9 million in authorized funds from the Pilot Phase budget into the Program Phase, the IOUs are authorized to collect up to \$48.3 million in incremental funding from IOU ratepayers to support the CHEEF programs through June 30, 2027. Table 19 provides a final breakdown of the original Pilot Phase budget allocations, expenditures, and remaining funds to carry over to the Program Phase. Table 20 shows incremental funding needed for the Program Phase budget through the end of FY 26.

Table 19: Pilot Phase Budget from 2014 through June 30, 2022

Item	Original Authorized Budget
CHEEF Administration (CAEATFA)	
<i>Start-up costs, Hub administration, direct implementation, outreach, and training</i>	
Allocated to CAEATFA for administration of the CHEEF	23,060,000
Expended through 6/30/22	(17,234,807)
Net CHEEF administration funds available to carry over to "Program Phase": FY 22-26 budget	5,825,193
Marketing, Education, Outreach (ME&O)	
Statewide ME&O plan initial allocation	8,000,000
Expended through 9/30/20	(7,954,727)
Net ME&O funds available to carry over to "Program Phase": FY 22-26 budget¹	45,273
Credit Enhancement (CE)	
Funds available for CEs after allocations for IOU and CAEATFA administration ²	25,336,024
Funds expensed for loan losses from claims ³	(252,467)
CE funds encumbered as of 6/30/22 ⁴	(5,070,010)
Unallocated CE funds available to carry over to "Program Phase": FY 22-26 budget	20,013,547
IOU Administration	
<i>Start-up costs, On Bill Repayment (OBR) build-out, direct implementation</i>	
Allocated for IOU administration ⁵	17,863,976
Expended through 6/30/22 ⁶	(17,863,976)
Net IOU administration funds available to carry over to "Program Phase": FY 22-26 budget	-
CHEEF Pilot Reserve	
Net pilot reserve funds available to carry over to "Program Phase": FY 22-26 budget⁷	984,931
Total Original Authorized Budget from “Pilot Phase” through FY 21	75,244,931
Total of Original Authorized Budget Expended or Allocated	(48,375,988)
Total remaining from original funds authorized in D.13-09-044	26,868,943

Table 20: New Incremental Funding for CHEEF Expenditures in "Program Phase" (July 1, 2022 – June 30, 2027)

Item	FY 22-26 Authorized Budget
Total Budget authorized in D.21-08-006 for CHEEF "Program Phase": FY 22-26	75,174,526
Original funds available to carry over to "Program Phase": FY 22-26 budget	(26,868,943)
Total new incremental funding for the CHEEF programs needed through FY 26⁸	48,305,583

Table 21 provides an itemized breakdown of initial allocations for the \$75.2 million Program Phase budget, current expenditures, and remaining balance. As of September 30, 2022, CAEATFA had expended \$530,000 of the \$23.3 million allocated for CHEEF Administration, Direct Implementation, and outreach to finance companies and contractors.

Table 21: Budget for CHEEF "Program Phase" Expenditures (July 1, 2022 – September 30, 2022)

Item	FY 22-26 Authorized Budget
CHEEF Administration, Direct Implementation, Outreach and Training	
Allocation for CAEATFA administration of the CHEEF ⁹	23,255,041
Expended through 9/30/22 ¹⁰	(530,261)
CHEEF Administration funds remaining	22,724,780
Marketing, Education, Outreach (ME&O)	
Allocation for Statewide ME&O	8,000,000
Expended through 9/30/22 ¹¹	(271,591)
ME&O funds remaining	7,728,409
Credit Enhancement (CE)	
Allocation	43,919,485
Total CE funds released to CAEATFA from IOUs as of 9/30/22 ¹²	(500,000)
CE funds in budget that remain available for release from IOUs	43,419,485
Total Authorized Budget for FY 22-26	75,174,526
Total FY 22-26 Budget Expended or Released	(1,301,852)
Total FY 22-26 Budget Remaining	73,872,674

The total cost of operating the CHEEF was \$4,202,207¹⁶ over the past four quarters (Q4 2021 through Q3 2022). This includes CAEATFA personnel costs, overhead costs such as rent and services received from the State Treasurers Office and other state agencies, operating expenses, expenditures for CHEEF contracted vendors, and Statewide Marketing Implementer expenditures. Relative to CHEEF program participation over this period, this means that there was \$0.23 in program spending for each \$1.00 in private capital leveraged, and \$1.47 in program spending for each \$1.00 in CE funds allocated. This represents a 29% decrease in administrative spend per dollar of private capital leveraged and a 30% decrease in administrative spend per dollar of CE funds allocated compared to the four quarters before that (Q4 2020 through Q3 2021).

¹⁶ The total cost for operating the CHEEF includes personnel costs, overhead, expenditures for CHEEF contracted vendors, and Statewide Marketing Implementer expenditures. To improve accuracy of actual operating costs, infrequently or periodically invoiced costs (e.g., CHEEF portion of annual rent expenses) are assigned or prorated for the applicable month(s) in which services were rendered, or estimated based on anticipated costs if not yet invoiced. As a result, this total may deviate from the actual expenditures paid in the period shown in Table 21.

Beginning in Q2 2022, CAEATFA began extending electric measure eligibility to IOU gas customers who receive electric service from a non-IOU provider. In accordance with Decision D.21-08-006 and cost allocation methodology subsequently approved by the CPUC, CAEATFA separately tracks the cost allocations associated with this extension of eligibility for GoGreen Home, and entered into an agreement with Energy Solutions under the TECH Clean California Initiative to fund those costs with non-IOU PPP funds. Table 22 provides a summary of those current expenditures and Credit Enhancement contributions.

Table 22: TECH Clean California Expenditures and Allocations (through September 30, 2022)

Administrative Costs	
Start-up and fixed costs (e.g., initial outreach, accounting set-up, reporting)	24,717
Variable, per loan costs (e.g., loan reviews, processing & compliance verifications)	1,288
Administrative Total	26,005
Credit Enhancement Allocations	
Currently encumbered as of 9/30/22	88,700

Budget End Notes

1. Net ME&O funds are the \$8 million initially allocated for statewide ME&O minus \$7,954,727 expended by the Marketing Implementer through 9/30/2020, as reported to CAEATFA. The previous contract for the Marketing Implementer administered by SoCalGas ended on 9/30/2020. Resolution E-5072 permitted a new contract to be issued with spending at previous levels and using funding from other energy efficiency funding already approved and unutilized, under which the Marketing Implementer spent an additional \$1,484,643 from 10/1/2020 through 6/30/2022. Additionally, the initial allocation for ME&O also included \$2 million to CAEATFA for outreach to finance companies and contractors, and is included in the total allocated to CAEATFA administration of the CHEEF.
2. Initial CE allocation per D.13.09.044 was \$42.9 million. Program Implementation Plans (PIPs) filed by the IOUs and CHEEF in 2014 and 2015 earmarked \$9,863,976 for Admin and Direct Implementation by the IOUs, and Resolution E-5072 allowed CAEATFA to re-allocate \$7.7 million of CE funds for CAEATFA administrative purposes while awaiting an initial long-term budget from the CPUC.
3. Funds expensed are claims paid out when a lender submits a claim for an enrolled loan default minus subsequent recoveries reimbursed back to the program.
4. Credit Enhancement funds are allocated to Lender Loss Reserve accounts and recaptured for future redeployment when loans are paid off.
5. Net IOU administration funds are the \$9,863,976 earmarked in the Program Implementation Plans (PIPs) filed by the IOUs and CHEEF in 2014 and 2015 for Admin and Direct Implementation by the IOUs plus an additional \$8 million allocated for IOU IT costs.
6. CAEATFA does not have access to IOU expense details and assumes that all originally allocated IOU administration funds were spent. Decision 17.03.026 approved additional expenditures of up to \$500,000 per year, per IOU (and \$800,000 for SoCalGas) from 2017 through 2020, using funding from energy efficiency funding already approved or for incremental funding, subject to the Advice Letter process. Resolution E-5072 authorized the IOUs to continue supporting the CHEEF Programs using their Annual Budget Advice Letter or separate advice letter processes and include funds in future business plan filings.
7. Net pilot reserve funds are the initial allocation of \$9,344,931 minus \$8.36 million re-allocated to CAEATFA administration of the CHEEF as authorized by the Joint Ruling of Assigned Commissioner and Administrative Law Judge on Financing Pilots and Associated Marketing Education and Outreach Activities, November 2016.
8. This represents the maximum incremental funding from IOU ratepayer customers for implementation of the CHEEF programs through 6/30/2027, as directed in Decision D.21-08-006, at 17. The joint IOU and CAEATFA budget Advice Letter 5883G, submitted 10/8/2021 and accepted by the CPUC effective 11/08/2021, approved an incremental funding request of \$51,187,749 based on the spending and loan

activity forecasts through 6/30/2022 that were made at that time. Actual expenditures turned out to be lower.

9. Funds were authorized per Joint Advice Letter 5883G, filed October 8, 2021 and accepted November 8, 2021.
10. Quarterly expenditures are based on good faith estimates due to a lag in invoice submittals.
11. The contract for the statewide Marketing Implementer is administered by SoCalGas, and numbers reflect data reported to CAEATFA.
12. Once released to CAEATFA, Credit Enhancement funds are allocated to Lender Loss Reserve accounts and recaptured when loans are paid off. They may also be paid out if a lender submits a claim for a default. Encumbered CE funds from the Program Phase budget are intermixed with previously-encumbered CE funds from the Pilot Phase budget, so CE funds under the Program Phase budget are expressed according to their release to CAEATFA from the IOUs. For more detail, see tables Table 9 (Summary of Charge-Offs, Claims Paid and Recoveries) and Appendix 2 (Loss Reserve Account Beginning and Ending Balances).

Appendix 2: Loss Reserve Account Beginning and Ending Balances

IOU Holding Accounts

The IOUs release funds into their respective holding accounts upon approval of CAEATFA staff request. CAEATFA staff coordinates with the IOUs to ensure acceptance of the funds from the IOUs and transfer of these funds to the appropriate Program account.

Table 23: Balance of IOU Holding Accounts

	SCG	PG&E	SCE	SDG&E
Beginning Balance (7/1/2022)	\$829	\$825	\$789	\$835
Release of CE Funds from IOUs	\$0	\$500,000	\$0	\$0
Transfer of CE Funds to GoGreen Home Account	\$0	(\$500,000)	\$0	\$0
Transfer of CE Funds to Operational Reserve Fund Account	\$0	\$0	\$0	\$0
Interest Accrued	\$3	\$14	\$3	\$3
Ending Balance (9/30/2022)	\$833	\$839	\$792	\$838

GoGreen Home-Related Accounts

- The **GoGreen Home Program Account** holds the available portion of the requested CE funds that are used to credit enhance projects enrolled in the Program. Once a project is enrolled in the Program, the CE portion of the Claim Eligible Amount is transferred to the Participating Lender's Loan Loss Reserve (LLR) Account. The IOUs hold additional funds budgeted for the Program, and those funds are available to be released to the holding account when needed, then transferred to the Program account.
- The **GoGreen Home Interest Account** holds the interest swept¹⁷ from the GoGreen Home Program Account and all the GoGreen Home Lender Loan Loss Reserve Accounts.

Table 24: Balance of GoGreen Home-Related Accounts

	GoGreen Home Program	GoGreen Home Interest
Beginning Balance (7/1/2022)	\$382,923	\$15,821
Credit Enhancement (CE) Funds Released from IOUs	\$500,000	\$0
Contributions to Lender Loss Reserve Accounts	(\$1,005,835)	\$0
Funds Recaptured from Recoveries	\$10,644	\$0
Funds Recaptured from Annual Rebalance	\$506,268	\$0
Funds Transferred from GGMF Program Account¹⁸	\$150,000	\$0
Net Interest Earned	\$1,387	\$78
Net Interest Swept	(\$1,387)	\$19,487
Ending Balance (9/30/22)	\$544,451	\$35,386

¹⁷ Interest earned in all GoGreen Home-related accounts is swept on a monthly basis into the GoGreen Home Interest account. For Q3 2022, interest earned on GoGreen Home -related accounts totaled \$19,565 of which \$78 was earned and retained in the GoGreen Home Interest account, \$1,387 was earned and swept from the GoGreen Home Program account, and \$18,100 was earned and swept from the nine GoGreen Home Lender LLR accounts.

¹⁸ Funds were temporarily transferred on July 29, 2022 from the GGMF Program Account to the GGH Program Account to ensure liquidity for new loss reserve contributions while awaiting a new CE funding request received September 13, 2022 from PG&E. The funds will be subsequently returned to the GGMF Program Account.

GoGreen Home Lender Loan Loss Reserve Accounts

Each time a lender enrolls a project, a loss reserve contribution of either 11% or 20% (depending on whether the loan was made to an underserved borrower) is transferred from the GoGreen Home Program Account into the respective lender's LLR Account. The ending balance on the table below shows the amount the lender has available to offset a borrower defaulting on a loan.

Annual Rebalance of Lender Accounts

D. 13-09-44 directs CAEATFA to recapture funds periodically when loans are paid off to meet the goal of developing a sustainable program, and D. 17-03-026 gives CAEATFA the ability to true up its credit enhancement funds at its discretion. CAEATFA has chosen to complete the recapture of Credit Enhancement funds through an annual rebalance. The rebalance occurs annually in August for the previous fiscal year running July 1-June 30; the rebalance appears in the Q3 report. Recaptured funds are transferred from the Lenders' LLR Accounts back to the Program Account. Claims made by a Lender during the fiscal year reduce the amount of funds recaptured.

Table 25: Balance of GoGreen Home Lender Loss Reserve Accounts

	California Coast Credit Union	Desert Valleys Federal Credit Union	Eagle Community Credit Union	First U.S. Community Credit Union	Matadors Community Credit Union	One Finance	Pasadena Service Federal Credit Union	Travis Credit Union	Valley Oak Credit Union
Beginning Balance 7/1/2022	\$2,371,711	\$67,069	\$30,056	\$600,400	\$1,242,388	\$135,667	\$7,301	\$355,236	\$91,227
Claims Paid	(\$33,374)	\$0	\$0	\$0	(\$23,277)	\$0	\$0	\$0	\$0
IOU PPP funds recaptured	(\$258,350)	(\$7,803)	(13,955)	(43,403)	(\$142,391)	(\$2,794)	\$0	(29,827)	(\$7,744)
Loss Reserve Contributions¹⁹	\$281,746	\$4,031	\$0	\$285,101	\$122,372	\$0	\$0	\$360,383	\$4,005
Net Interest Earned	\$8,503	\$237	\$94	\$2,378	\$4,478	\$500	\$27	\$1,557	\$325
Net Interest Swept	(\$8,503)	(\$237)	(\$94)	(\$2,378)	(\$4,478)	(\$500)	(\$27)	(\$1,557)	(\$325)
Ending Balance 9/30/2022	\$2,361,733	\$63,297	\$16,101	\$842,098	\$1,199,092	\$132,873	\$7,301	\$685,792	\$87,488

¹⁹ A net total of \$1,057,638 in Loss Reserve Contributions were made in Q3 2022, of which \$1,005,385 were IOU PPP funds from the GoGreen Home Program Account, and \$52,254 were from credit enhancement funds provided by the TECH Clean California Initiative in accordance with CPUC-approved cost allocation methodology.

GoGreen Business-Related Accounts

Loss reserve accounts for GoGreen Business operate under a similar process as those for GoGreen Home loss reserve accounts. Each time a finance company enrolls a project, 20% of the first \$50,000 of the agreement and 5% of the next \$950,000 is transferred from the GoGreen Business Program account into the respective finance company's loss reserve account. The ending balance on Table 27 below shows the amount the finance company has available in the loss reserve to offset a customer defaulting on a finance agreement.

Table 26: Balance of GoGreen Business-Related Accounts

	GoGreen Business Program	GoGreen Business Interest
Beginning Balance 7/1/2022	\$194,599	\$1,741
Contributions to Loss Reserve Accounts	(\$11,718)	\$0
Net Interest Earned	\$730	\$8
Net Interest Swept²⁰	(\$730)	\$1,458
Ending Balance 9/30/2022	\$182,881	\$3,207

Table 27: Balance of GoGreen Business Lender Loss Reserve Accounts²¹

	Ascentium Capital	DLL Financial Solutions Partner	Verdant Commercial Capital
Beginning Balance 7/1/2022	\$98,183	\$82,068	\$25,149
Claims Paid	\$0	\$0	\$0
Contributions to Loss Reserve Accounts	\$0	\$0	\$11,718
Net Interest Earned	\$346	\$299	\$83
Net Interest Swept	(\$346)	(\$299)	(\$83)
Ending Balance 9/30/2022	\$98,183	\$82,068	\$36,868

²⁰ Interest earned in all GoGreen Business-related accounts is swept on a monthly basis into the GoGreen Business Interest account. For Q3 2022, interest earned on GoGreen Business-related accounts totaled \$1,466, of which \$8 was earned and retained in the GoGreen Business Interest account, \$730 was earned and swept from the GoGreen Business Program account, and \$728 was earned and swept from the three funded GoGreen Business Finance Company LLR accounts.

²¹ Loss reserve accounts exist for all eight Finance Companies participating in GoGreen Business. Account activity will be reported for the remaining Finance Companies upon enrollment of their first financing agreement with the Program.

Appendix 3: Impact of the Credit Enhancement

The credit enhancement mitigates risk for lenders, yielding better loan terms for customers and encouraging more energy efficiency lending that will help California achieve its greenhouse gas reduction goals. The information below is based on GoGreen Home, the longest-running CHEEF Program.

Based on CAEATFA's agreements with GoGreen Home lenders, the credit enhancement has resulted in better terms and approval rates for customers. When interested financial institutions submit an application to become a lender, CAEATFA asks them to describe their most similar loan product (typically an unsecured personal loan) and to describe their current interest rate, minimum credit scores, maximum loan amounts and maximum terms for these loans. With this information, CAEATFA is able to ensure that the final and approved GoGreen Home product offers appropriate benefits for borrowers in exchange for lender access to the credit enhancement.

How the Credit Enhancement Makes Financing Feasible for Borrowers

Lenders have made improvements to their existing underwriting criteria as a result of the credit enhancement (which takes the form of a loan loss reserve) that significantly benefit potential borrowers. Private capital leveraged through the Program not only offers improved rates and terms, but often renders energy efficiency projects feasible. Monthly payments are reduced by more than \$300 on average for borrowers who take advantage of the 15-year term length offered by the majority of participating lenders, when compared with a standard 5-year unsecured loan. Coupled with lower interest rates and broader approval criteria, this greatly enhances the appeal and viability of financing for most borrowers and frequently makes the difference between completing or not completing an energy retrofit. This example illustrates these features in practice, using current rates and terms from a Participating Finance Company:

	Without GoGreen Home	With GoGreen Home
Loan Details	Borrower has a credit score of 600 and seeks \$15,000	
Financing Product	Unsecured personal loan	GoGreen Home Energy Loan
Interest Rate	20.88%	6.38%
Term Length	5 years	15 years
Monthly Payment	\$405	\$130

Feasibility of financing is measured in a number of ways:

- **Access to credit:** Lenders typically require borrowers to have a minimum credit score of around 640 for unsecured loans of any significant value. Through GoGreen Home, lenders are able to approve loans for borrowers with credit scores as low as 580.
- **Affordable monthly payments:** The vast majority of private lenders typically offer a maximum term length of 5 years for unsecured loans. Through GoGreen Home, lenders are able to extend terms out to 15 years, which significantly lowers monthly payments for borrowers.
- **Access to capital:** Sufficient access to capital is needed for deeper energy retrofits. While lenders typically limit unsecured loans to about \$25,000, most lenders are able to offer up to \$50,000 for all borrowers through GoGreen Home.

See Table 12 (Financing Feasibility Metrics) in the GoGreen Home reporting section for tracking of GoGreen Home loans enrolled that demonstrate these criteria.

Table 28: Impact of the Credit Enhancement on Loan Terms by GoGreen Home Lender

Because lenders are free to set their own underwriting criteria within program guidelines, individual products vary from lender to lender. The table below provides some highlights of changes that resulted from the credit enhancement. When a range is stated below, it generally ties back to the borrower's credit score.

	Interest Rate	Minimum Credit Score	Maximum Loan Amount	Maximum Loan Term
STATEWIDE LENDERS				
California Coast Credit Union	<i>Reduced by:</i> 92 – 1650 basis points (bps) ²²	No change from existing 600	<i>Increased:</i> \$30,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
Matadors Community Credit Union	<i>Reduced by:</i> 641 – 891 bps	<i>Reduced:</i> 660 to 580	<i>Increased:</i> \$15,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
REGIONAL LENDERS				
Desert Valleys Federal Credit Union	<i>Reduced by:</i> 849 – 1200 bps	No change from existing 580	<i>Increased:</i> \$15,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
Eagle Community Credit Union	<i>Reduced by:</i> 704 – 1179 bps	No change from existing 580	<i>Increased:</i> \$25,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
First US Community Credit Union	<i>Reduced by:</i> 280 – 1154 bps	<i>Reduced:</i> 640 to 580	<i>Increased:</i> \$25,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
One Finance	<i>Reduced by:</i> 518 bps	<i>Reduced:</i> 640 to 580	No change from existing \$5,000	No change from existing 5 years
Pasadena Service Federal Credit Union	<i>Reduced by:</i> 350 – 850 bps	No change from existing 600	<i>Increased:</i> \$20,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
Travis Credit Union	<i>Reduced by:</i> 200 – 300 bps	<i>Reduced:</i> 680 to 600	<i>Increased:</i> \$35,000 to \$50,000	No change from existing 15 years
Valley Oak Credit Union	<i>Reduced by:</i> 333 – 783 bps	No change from existing 580	<i>Increased:</i> \$20,000 to \$50,000	<i>Increased:</i> 5 years to 15 years
<i>The interest rates reflected in this table are effective as of September 30, 2022.</i>				

²² “bps” = Basis point, a common unit of measure for interest rates. A single basis point is equal to 1/100th of 1% (e.g., 100 bps = 1%).

How the Credit Enhancement Helps Achieve Program Goals

The credit enhancement is more than just a financial mechanism. For CHEEF Programs, it means the difference between achieving program goals—increasing the availability of attractive financing for energy investments throughout California, including for underserved borrowers—and not. The table below demonstrates the impact of the credit enhancement in several scenarios:

Table 29: Impact of the Credit Enhancement on Achieving Program Goals

	Without GoGreen Home	With GoGreen Home
Borrower has a credit score of 600	Borrower would be unlikely to qualify for a personal loan.	Borrower may qualify for a GoGreen Home loan with a term of 5, 10 or 15 years, paying an interest rate as low as 3.49% for a 5-year term and 5.49% for 15 years.
Borrower wants a 5-year repayment term	Assuming a credit score of 600, borrower could take out a personal loan with a rate of 20.88% ²³ using a GoGreen Home lender's market-rate product. The resulting payment on a \$25,000 loan would be \$675 per month. Borrower may not be able to afford the high monthly payment.	Assuming a credit score of 600, borrower could qualify for a GoGreen Home loan with interest as low as 4.38% for a 5-year term, using the same lender's GoGreen Home product. Borrower's payment on a \$25,000 loan would be \$465 each month, a \$210 monthly savings from the lender's market-rate product.
Borrower wants the lowest monthly payment	Unsecured personal loans with 15-year terms are largely unavailable in today's market.	Borrowers can spread out monthly payments up to 15 years through GoGreen Home. Assuming a credit score of 600, a \$25,000 loan with a 15-year term could receive a rate as low as 6.38% from the same GoGreen Home lender, resulting in payments of only \$216 per month, a reduction of \$459 per month from the lender's 5-year market-rate product.

²³ The rate of the equivalent non-GoGreen Home signature loan product offered by a Participating Finance Company.

Appendix 4: Participating Finance Company Overview

All CHEEF Programs leverage private capital through participating Finance Companies. Each Finance Company enrolls in a CHEEF Program through an application process and subsequently receives credit enhancements for the financing they enroll that meets program criteria. There are currently:

- **9 participating GoGreen Home Lenders:** California Coast Credit Union, Desert Valleys Federal Credit Union, Eagle Community Credit Union, First US Community Credit Union, Matadors Community Credit Union, One Finance (servicing loans only), Pasadena Service Federal Credit Union, Travis Credit Union, and Valley Oak Credit Union
- **8 participating GoGreen Business Finance Companies:** Accessity, Alliance Funding Group, Ascentium Capital, DLL Financial Solutions Partner, Prime Capital Funding, Renew Energy Partners, Travis Credit Union and Verdant Commercial Capital
- **2 participating GoGreen Multifamily Finance Companies:** Ascentium Capital and Renew Energy Partners

Table 30: Participating GoGreen Home Lenders

	Date Enrolled	Areas Served	Type of Institution	Total Loans Enrolled	Loans Enrolled in Q3 2022

Appendix 6: CHEEF Infrastructure

CAEATFA is creating a statewide platform for finance companies and contractors to participate in the uptake of energy efficiency projects through increased access to financing. As the administrator of the CHEEF, CAEATFA is responsible for developing uniform program requirements, standardized documentation and processes, and acting as a central entity to facilitate investment in energy efficiency projects and implementation of the programs.

Key infrastructure elements needed to implement the CHEEF include a Master Servicer, Trustee Bank, Contractor Manager, Marketing Implementer, and Technical Advisors. Below are descriptions of each of these roles and information regarding their current status.

Master Servicer

<i>Organization</i>	Concord Servicing Corporation
<i>Duties</i>	The Master Servicer plays a key role in the daily administration of the programs, accepting loan enrollment applications and processing on-bill repayment transactions.
<i>Contract Term</i>	10/22/20 – 7/31/22
<i>Notes</i>	Option for two one-year extensions. In Q2 2022, CAEATFA exercised the option to extend the contract for one year, through 7/31/2023.

Trustee Bank

<i>Organization</i>	Zions Bank
<i>Duties</i>	The Trustee Bank holds the ratepayer funds provided by the IOUs to serve as Credit Enhancements under the various programs. CAEATFA provides direction to the Trustee Bank to transfer CE funds between various accounts.
<i>Contract Term</i>	1/1/21 – 12/31/23
<i>Notes</i>	No option for extension.

Contractor Manager

<i>Organization</i>	Electric & Gas Industries Association (EGIA)
<i>Duties</i>	The Contractor Manager recruits, enrolls, trains, and supports contractors and conducts quality control oversight of projects enrolled in the GoGreen Financing Programs.
<i>Contract Term</i>	5/29/22 – 5/28/25
<i>Notes</i>	This contract was approved by the Department of General Services on 5/31/22. This contract has an option for up to two one-year extensions.

Marketing Implementer

<i>Organization</i>	Riester
<i>Duties</i>	The Marketing Implementer is responsible for leading statewide marketing campaigns and administers GoGreenFinancing.com, the customer-facing platform for information on CHEEF programs. The contract for the Marketing Implementer is held by SoCalGas and is not administered by CAEATFA nor represented in CAEATFA's administrative costs. However, the Marketing Implementer works closely with CAEATFA and the IOUs to manage customer marketing for the programs. Riester was selected to take over the contract in Q2 2022 following a rigorous solicitation and review process.
<i>Contract Term</i>	7/1/22 – 6/30/25
<i>Notes</i>	The first three months of the contract with Riester overlap with the last three months of the incumbent's contract to allow for an onboarding and transition period. Riester's contract has an option for up to two one-year extensions.

<i>Organization</i>	Center for Sustainable Energy
<i>Duties</i>	See description above. The Center for Sustainable Energy (CSE) has served as the Marketing Implementer since 2014.
<i>Contract Term</i>	10/1/20 – 9/30/22
<i>Notes</i>	CSE was not selected to continue as the Marketing Implementer following the solicitation and review process conducted by SoCalGas in Q1 with input from CAEATFA and the IOUs. The last three months of CSE's contract overlap with the first three months of the incoming marketing implementer to aid with the transition.

Technical Advisor

The Technical Advisor provides expertise to CAEATFA in the development and implementation of the CHEEF programs.

<i>Organization</i>	Energy Futures Group (EFG)
<i>Duties</i>	Provides technical assistance for program research development and implementation.
<i>Contract Term</i>	4/19/22 – 4/18/25
<i>Notes</i>	A new contract was awarded to EFG after a competitive solicitation process in Q1. This contract does not have an option for extension.

Appendix 7: Program Design

GoGreen Home Energy Financing

The GoGreen Home Energy Financing Program (GoGreen Home) provides attractive financing to owners and renters of existing residential properties who select from a broad list of energy efficiency measures intended to reduce energy consumption. Customers may upgrade a single-family home, townhome, condo, duplex, triplex, fourplex or manufactured home. Renovations for up to four units can be bundled into the same loan.

As with all CHEEF programs, eligibility requires that the property receive electric or natural gas service from at least one of the IOUs: PG&E, SDG&E, SCE or SoCalGas. Properties in areas served by community choice aggregators (CCAs) or electric service providers (ESPs) qualify. Those in areas served by publicly owned utilities (POUs) qualify only if they also receive energy service from an IOU (for example, electricity from the Sacramento Municipal Utility District and natural gas from PG&E).

Previously, when lending to IOU gas customers who receive electric service from a non-IOU provider, lenders were limited in terms of the credit enhancement they would receive; only 30% of the “claim-eligible loan amount” (the portion of the loan that could be recouped through the loss reserve in the event of a default) could finance electric measures. Beginning in Q2 2022, funding from CAEATFA’s agreement with Energy Solutions under the TECH Clean California Initiative expands financing eligible for the credit enhancement to include any electric measure for a customer who receives gas service from an IOU.

The fuel source-related limitation described above still applies for loans made to IOU electric customers who receive gas from a non-IOU provider: in these cases, no more than 30% of the “claim-eligible” financed amount may be used to fund the installation of gas measures.

CAEATFA staff strive to make GoGreen Home financing available to underserved borrowers while also ensuring that credit is extended appropriately and without unintended negative consequences for the borrower. GoGreen Home loans are approved for customers with the cash flow to repay them, and customers who are eligible for free services are directed to them rather than encouraged to take on debt.

In keeping with the CPUC’s directive that a third of credit enhancement funds should support loans to Low-to-Moderate Income (LMI) customers, when GoGreen Home launched, the program provided a 20% loan loss reserve contribution for loans to LMI borrowers and an 11% loan loss reserve contribution to non-LMI borrowers. In 2018, reflecting the fact that lenders had a difficult time determining “household” income and lenders were more sensitive to credit scores than income status when approving or not approving loans, CAEATFA added an additional methodology to determine LMI eligibility and offered the 20% loan loss reserve contribution to credit-challenged customers. Currently, a 20% credit enhancement is provided for loans in which:

- **Property is in a LMI Census Tract** – Area Median Income (AMI) of the property census tract does not exceed 120% of the AMI for the Metropolitan Area, County, or State.
- **Borrower’s Household Income is Low-to-Moderate**– Borrower’s household income is at or below 120% of the AMI for the Metropolitan Area, County, or State.
- **Borrower is Credit-Challenged** – A borrower whose credit score is less than 640 (if the lender has opted in to the Credit-Challenged facility by demonstrating additional benefits to credit-challenged borrowers).

At the same time that the Program seeks to make financing available to underserved customers, GoGreen Home is a debt program, and borrowers, no matter their income or credit score, need to have adequate monthly cash flow to repay loans to avoid negative consequences. This is achieved through required debt-to-income limits and

the fact that lenders have “skin in the game” on every loan that they issue. Lenders are able to access up to 90% of the claim-eligible charged-off principal amount in the event of a default provided they have the funds in their loss reserve account.

GoGreen Home launched in July 2016, and the current Program regulations were adopted in May 2021. Program regulations may be viewed on [the CAEATFA website](#).

GoGreen Business Energy Financing

The GoGreen Business Energy Financing Program (GoGreen Business) provides financing to help small business property owners and tenants upgrade their equipment or buildings. Financing through GoGreen Business is available to small businesses, nonprofits and market rate multifamily properties (5 or more units) that meet at least one of the following business size requirements: Employ 100 or fewer individuals; receive annual revenue of less than \$15 million; and/or fall within SBA size guidelines (annual revenue limits up to \$41.5 million, depending on industry).

Business owners are able to finance 100% of project costs and may finance a single measure project or a comprehensive and deep energy retrofit. There are three methods of project qualification for GoGreen Business:

1. The Program has published a searchable and downloadable [list of pre-qualified energy saving measures \(ESMs\)](#). Measures on the ESM list can be financed without any additional approval. This includes any measure that qualifies for an IOU, REN or CCA program.
2. Any measure approved by an IOU, REN, or CCA custom incentive program for the property within the last 24 months is eligible.
3. For any measures that are not listed on the ESM list or tied to a custom incentive program, an Energy Professional can certify that the installation of the measure will result in energy savings compared to existing conditions. For GoGreen Business, an eligible Energy Professional is a California licensed Professional Engineer (PE) or an Association of Energy Engineers Certified Energy Manager (CEM).

As with all CHEEF Programs, eligibility requires that the property receive electric or natural gas service from at least one of the IOUs: PG&E, SDG&E, SCE or SoCalGas. Properties in areas served by community choice aggregators (CCAs) or electric service providers (ESPs) located within IOU territories qualify. Those in areas served by publicly owned utilities (POUs) qualify only if they also receive energy service from an IOU.

To best accommodate the small business energy efficiency market, GoGreen Business facilitates a variety of financing instruments for potential customers to consider, including loans, equipment leases, service agreements and savings-based payment agreements; each participating Finance Company offers products from this menu of authorized instruments. Several Finance Companies offer the option to repay financing through the utility bill using the program’s On-Bill Repayment functionality. Small business owners may finance up to \$5 million. Available financing options are viewable on the [GoGreen Financing website](#).

For participating finance companies, up to \$1 million of the financed amount is eligible to receive a credit enhancement in the form of a loss reserve contribution, as follows:

- The first \$50,000 of claim-eligible financing will receive a loss reserve contribution at 20%
- Remainder (up to an additional \$950,000) will receive a loss reserve contribution at 5%
- Maximum loss reserve contribution per agreement will be \$57,500

Lenders are able to access up to 90% of the claim-eligible charged-off principal amount in the event of a default provided they have the funds in their loss reserve account.

GoGreen Business launched in July 2019, and current Program regulations went into effect in August 2022. Program regulations may be viewed on [the CAEATFA website](#).

GoGreen Affordable Multifamily Energy Financing

GoGreen Affordable Multifamily Energy Financing (GoGreen Multifamily) seeks to facilitate energy efficiency retrofits in multifamily properties of five or more units where at least 50% of the units are income-restricted at low to moderate (80-120% of area median income). To be eligible, properties must remain affordable for at least five years.

GoGreen Multifamily will fund any energy efficiency or demand response measure approved for rebate and incentive by any IOU, REN or CCA, as well as any measure from the Energy Saving Measures list developed for use in GoGreen Business. In-unit as well as common area measures are eligible. The financed amount may include non-energy efficiency improvements; solar photovoltaic and distributed generation may be financed but will not receive a credit enhancement.

Key GoGreen Multifamily features include:

- No minimum or maximum financing size
- The first \$1 million of each financed project will be credit enhanced at 15% of the claim-eligible amount
- Fixed or variable rates allowed
- No underwriting requirements imposed on the Finance Company; underwriting is based on participating Finance Company requirements
- Designed to integrate with existing affordable multifamily housing energy programs such as the Low-Income Weatherization Program (LIWP) and Solar On Multifamily Affordable Homes (SOMAH)

Like GoGreen Business, GoGreen Multifamily supports traditional loans and leases as well as energy service agreements and savings-based payment agreements. Available financing options are viewable on the [GoGreen Financing website](#).

As with all CHEEF Programs, eligibility requires that the property receive electric or natural gas service from at least one of the IOUs: PG&E, SDG&E, SCE or SoCalGas. Properties in areas served by community choice aggregators (CCAs) or electric service providers (ESPs) located within IOU territories qualify. Those in areas served by publicly owned utilities (POUs) qualify only if they also receive energy service from an IOU.

GoGreen Multifamily regulations went into effect in June 2020. Program regulations may be viewed on [the CAEATFA website](#).

Nonresidential Program

In Q2 2022, CAEATFA submitted a proposal to the CPUC for reauthorization of a Public Buildings and Large Commercial Program modeled after the Nonresidential Program, which was authorized in 2013. Like all the CHEEF financing programs, the Public Buildings and Large Commercial Program is intended to encourage growth in private market lending to support energy efficiency improvements, in this case for large commercial buildings and those in the municipal, universities, schools and hospitals (MUSH) sector. The Program will be designed to provide energy efficiency financing, which will be repaid on the utility bill.

Launch of the originally authorized Nonresidential Program was dependent on the development of On-Bill Repayment (OBR) functionality, which was not available until 2022. Because D.17-03-026 from the CPUC

required all CHEEF programs to be launched by the end of 2019, the Nonresidential Program was effectively cancelled at that point.

A response from the CPUC is anticipated in 2023.

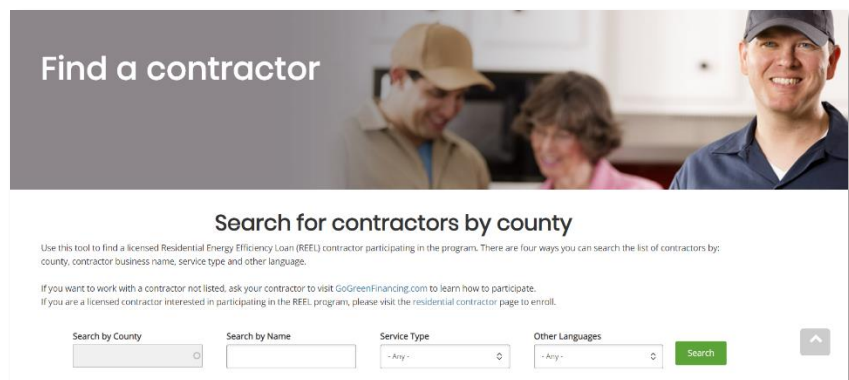

Appendix 8: Customer-Facing Products

Customer-facing products are discussed throughout this report, but this Appendix functions as a summary.

gogreen FINANCING™ Designed and implemented by the Marketing Implementer, Riester, with input and direction from CAEATFA and the IOUs, GoGreen Financing (www.gogreenfinancing.com) serves as the primary customer-facing platform for the financing programs. The platform was translated into Spanish in November 2020 (www.gogreenfinancing.com/es).

GoGreen Financing contains information for end users (customers), contractors, finance companies and partners for each of the programs. Some of the resources on the website include:

- Pages that allow potential GoGreen Home borrowers to find a local participating Contractor, review the rates of participating Lenders and apply for a GoGreen Home loan online through the participating Lender's website
- Pages that allow potential GoGreen Business customers to find a participating Contractor or Project Developer, review the products offered by participating Finance Companies and apply for a GoGreen Business finance agreement through the participating Finance Company's website
- Program descriptions and benefits of GoGreen Multifamily and information about products offered by participating Finance Companies
- Partner resources for interested contractors, finance companies, local governments and nonprofits (some of which are available to these organizations to co-brand), including:
 - Customer-facing flyers, available in both English and Spanish
 - Finance company comparison charts
 - PowerPoint Presentations
 - Partner talking points
 - GoGreen Home case studies

The screenshot shows a web interface titled "Find a contractor" with a background image of three people. Below the title is a section "Search for contractors by county" with a small explanatory text: "Use this tool to find a licensed Residential Energy Efficiency Loan (REEL) contractor participating in the program. There are four ways you can search the list of contractors by: county, contractor business name, service type and other language." Below this is another line of text: "If you want to work with a contractor not listed, ask your contractor to visit GoGreenFinancing.com to learn how to participate. If you are a licensed contractor interested in participating in the REEL program, please visit the residential contractor page to enroll." At the bottom, there are four search criteria: "Search by County" (a dropdown menu), "Search by Name" (a text input field), "Service Type" (a dropdown menu with "- Any -" selected), and "Other Languages" (a dropdown menu with "- Any -" selected). To the right of these fields is a green "Search" button and a small upward arrow icon.

Appendix 9: Reporting Requirements

CPUC Decision 21-08-006 requires CAEATFA to report on metrics and key performance indicators from the CHEEF Programs, including performance metrics previously adopted for financing evaluations in Attachment 1 of Resolution E-4900. While most of the requested reporting has been included in these reports for several years prior to these requirements being issued, some aspects require significant capacity to implement and will need to be incorporated into quarterly reports on a rolling basis through Q4 2022. The tables below outline these reporting requirements and CAEATFA's compliance with them.

Table 36: CHEEF Program Reporting Requirements from Resolution E-4900, Attachment 1

	Current Reporting Status	Target Reporting Timeframe	Notes
Number of loans issued: <ul style="list-style-type: none"> Monthly growth Total amount financed Geographic distribution of loans 	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement	
Private capital participation: <ul style="list-style-type: none"> Number of participating lenders Types of financial institutions participating Amount of private capital attracted 	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement	
Reach to underserved Californians: <ul style="list-style-type: none"> Credit scores of loan recipients Payback term length Percentage of participants deemed "underserved" by CalEnviroScreen data Whether participants would have qualified for or been able to accept loans from existing programs 	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement; additional data on participant qualification added in Q3 2021	New data has been added to the quarterly reports and monthly data summaries as of September 2021 to provide insight into whether financing would have been feasible for borrowers without the program and the products borrowers would have been able to qualify for from participating lenders without the CHEEF Programs.
Energy savings²⁵: <ul style="list-style-type: none"> Through customer meter data Through NMEC analysis Comparison of energy savings from other loan programs 	Included in a standalone, bi-annual report	Q2 2022	The first GoGreen Home Deemed Energy Savings Report was published in April 2022; the second Report was published CAEATFA will not be able to provide an NMEC analysis until limitations with the IOUs' ability to share actual energy usage data and challenges around data security are resolved.

²⁵ D.21-08-006 allows for flexibility in how CAEATFA reports on this metric; while all three metrics adopted in Resolution E-4900 are required for formal evaluations of the Programs, D.21-08-006 asks CAEATFA to report on "annual estimated energy savings from installed measures."

Table 37: CHEEF Program Reporting Requirements from D.21-08-006	Current Reporting Status	Expected Reporting Timeframe	Notes
Customer participation	Included in quarterly reports	Reporting pre-dates requirement	Several data points are provided, including loan volume and enrollment maps.
Loan performance statistics	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement	Currently reported for GoGreen Home, as other programs have not yet experienced any defaults or recoveries.
Costs associated with service of non-IOU customers	Included in quarterly reports	Q1 2022	Reporting began in Q1 2022, when the first expenses supported by a non-IOU funding source (in this case, TECH Clean California) were paid.
Administrative costs of the CHEEF (in nominal dollars and as a % of program spending)	Included in quarterly reports	Reporting pre-dates requirement for nominal dollar; % of program spend included as of Q3 2022	Administrative costs have been reported as part of the budget table in Appendix 1. As of Q3 2022, the ratio of administrative costs to program enrollment volume has been added to demonstrate the cost effectiveness of administering the CHEEF programs.
Annual estimated energy savings from installed measures	Included in a standalone, bi-annual report	Q2 2022	The first GoGreen Home Deemed Energy Savings Report was published in April 2022, with the second report published in September 2022. The report will be updated on a bi-annual basis.
Annual estimated non-energy benefits from installed measures	Financial benefits are currently reported	Q1 2023	Interest rate savings and monthly payment reductions due to the credit enhancement are currently reported for GoGreen Home (see Table 11). Staff plans to launch a post-project customer survey to collect information about other non-energy benefits in late 2022 or early 2023.
Geographic breakdown of financing that includes, to the extent possible, ethnicity and socioeconomic data of borrowers	Not currently reported	Q1 2023	Staff has begun developing, and plans to launch, a post-project customer survey to collect this data (to the extent possible) in Q1 2023.
Mean and median loan values	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement for mean values; median values included as of Q3 2021	
Mean and median Annual Percentage Rates (APRs)	Included in quarterly reports and monthly data summaries	Reporting pre-dates requirement for mean values; Q3 2021 for median values	GoGreen Home interest rates are currently equivalent to the APR as no additional fees are charged by participating lenders for these loans.
